

Looking for a clever backend engineer

Job Qualifications

We are looking for a person/people with a solid engineering background that can quickly adapt to new languages, tools and technologies, and have broad knowledge of and experience with computing issues. We need a senior backend expert. BS in EE or CE or in related field required, MS preferred. Good knowledge of OOP concepts and design patterns is mandatory.

Job Description

The development may involve (distributed) applications, communications, encryption, messaging, system software, GUI, databases, to name a few.

Tools:

- PHP 5.4 (+ XDebug, XHProf)
- Testing with PHPUnit
- Node.js
- MySQL
- MongoDB

You will become a member of the core team by providing crucial engineering support. This is a hands-on position where specification polishing, creativity, ability to independently deliver high quality code are all required. This is not an entry-level position and experience is required.

You will be working closely with our local team and communicate in English on a daily basis.

Desirable:

- Good written and spoken English,
- Experience with Agile methodology.

Terms:

- Trial period: 2 months,
- The office is on Novi Beograd.

Please e-mail your detailed CV (in English) with the subject line "backend expert" to: jobs@prelovac.com
